HOW TO FIND PAPERS PRESENTED AT 1978 ASME MEETINGS

The technical programs of the meetings of the Society and of its Professional Division have been published in MECHANICAL ENGINEERING and may be located by consulting the index on page SR-33. Many of these papers will be published in MECHANICAL ENGINEERING or the *Transactions* and may be located by reference to the indexes of these publications. A free, up-to-date edition of the ASME Technical Papers Catalog is available on request. Xerox copies of out-of-print technical papers may be purchased from the Engineering Societies Library, 345 E. 47th St., New York, NY 10017. Phone (212) 644-7611.

Special Services

In order to expedite European orders for the ASME Boiler and Pressure Vessel Code and related titles, special arrangements have been made with the British Standards Institution, (T.H.E.) Maylands Avenue, Hemel Hempstead, Herts HP2 4SQ, England, to stock and sell these titles.

For the convenience of our customers on the West Coast, special arrangements have been made with Global Engineering Documentation Services, Inc., 3301 W. MacArthur Blvd., Santa Ana, CA 92704, to stock and sell Codes and Standards.

Complete sets of all Codes and Standards are available for sale on microfilm from Information Handling Services, 15 Inverness Way East, Englewood, CO 80150.

Select out-of-print symposia and proceedings and ASME journals may be obtained on microfilm on in xerographic form. Contact Xerox University Microfilms, Books and Collections, 300 North Zeeb Road, Ann Arbor, MI 48106.

CURRENTLY AVAILABLE ASME PUBLICATIONS

ASME CODES

Performance Test Codes

Test methods prescribed in the PTC's enable users to obtain accurate information on adaptability of equipment, best methods of operation, capacity and efficiency, and verification of manufacturer's guarantees. Each one contains a check list of items on which agreement should be reached before starting tests, specifies the instruments and testing apparatus needed, lists precautions, gives instructions for computing and tabulating results and shows how to correct results for deviations from specified test conditions.

The Performance Test Codes Committee is following a policy of submitting the PTC Documents to ANSI for approval as American National Standards. The documents that have been approved bear the ANSI/ASME designation. This PTC/ANSI relationship will reduce duplication of effort and promote the consensus standards concept.
